

Patient's Name: Mrs. xxxxxx

Dentist's Name: Dr. Hahsemi Nasab

Age: 56 yo

Examination Type: CBCT – TMJ Evaluation

Examination Date: 1393/04/24

Patient's ID: 2664

CBCT examination of right TMJ was done with Promax 3D machine. Cross sectional views with 1 mm slice interval were prepared.

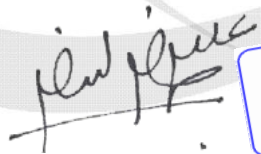

**Radiographic Findings:**

**Right TMJ:** Flattening of the superior surface of the head of condyle is seen. Pneumatization of the articular eminence is obvious.

**Left TMJ:** Flattening of the superior surface of the condylar head is seen. Lipping of the anterior surface of the head of condyle is seen (arrow head). Erosion of the posterior slope of the articular eminence is obvious (arrow).

**Impression:**

Degenerative changes in left TMJ is seen.

Sincerely

Dr. Alireza Ordoukhani  
Oral & Maxillofacial Radiologist
